

# Humidification Cover

The RH Humidification Cover is for the gentle humidification of objects with humidified air supplied by an electronic ultrasonic humidifier. It is constructed of thermoformed acrylic sheet and matt black anodised aluminium. For easy storage, it folds away flat to just 30 mm thick and should be stored and transported in the zip folder supplied. Due to the pyramid shape, should any condensation form on the internal surface of the cover, it will run down to the outer edges of the cover and not drip on to the object being humidified.

The RH Humidification Cover is designed for use on the RH Suction Table Worktop or directly on a bench top.

Standard sizes:

- 900 mm x 600 mm
- 1200 mm x 900 mm
